

COMPLIMENTS

1. All the information that was in the pages was good visible. There wasn't a lot of surrounding and unnecessary text
2. The motivation for the studies is good
3. They like the dates that I put with the blog posts

IMPROVEMENTS

1. I have to add more color to the page, this way there will also be more identity to my page (carelessness)
2. Add some information to the page, e.g. more information with the motivation. (carelessness)

CODE REVIEW FEEDBACK

1. It should be easier to change colors in my page, at some points I need to change 2 lines to change the color of my header (fallacy)
 2. give better names to my classes (fallacy)
3. Format the page to be easier to change things later on (this is pretty much done except the feedback that I received on the pitching)

TASKS

1. change the names of classes
2. Add some colors
3. Improve the missing information to the page
4. make it easier to change colors
5. Give the site more personality

Evaluation of pitch and website

Student name	Valentijn Boonstra.
Evaluated by	Daphne Heengen.

Front end, design and presentation

In the pitch of about 5 minutes, mark the following four categories and provide feedback for the student.

1. Are all necessary webpages implemented

Website is obviously missing important content	All necessary pages are there with content
------------------------------------------------	--------------------------------------------

2. Design Creativity & presentation

On a scale of 1 to 5, how much do the website and pitch exhibit creativity, well thought out design and well presented? Is it complete with necessary content Think of original points of view, used resources, layout and design, and other "wow" factors.

1 2 3 4 5

Leave the postcard made.

3. Study & Career Motivation

On a scale of 1 to 5, how motivated does the student appear for the ICT domain and programme?

Think of how detailed the motivation is described or not, Conveys knowledge on the program, different careers and possibilities within the IT field, Knowledge about strengths but also how to tackle potentials risks or personal challenges.

1 2 3 4 5

Constructive Feedback on how to improve

- nice design a lot of effort put in! so well done.
for the assessment you might want to look @ your color scheme value on black is hard to read.
- intrinsically motivated is very clean, good to hear
Damen got you motivated > give information for what you want to do in the future!
I would add that to your motivation talk!

Back-end coding and technical skills

In the next 5 minutes, mark the following subjects by asking questions. Students can include examples in their presentation. If necessary, provide feedback for the student below tables.

4. Functionality

Does not exist or does not meet requirements	It is shown that the functionality is implemented but not completely according to specification.	Navigation, side menu, SEO and hosting are implemented according to specifications
----------------------------------------------	--------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------

5. Development environment

Very basic editor, no web server, no easy way to work in a folder with multiple files	Good code editor. Website hosted from computer. Can easily work with multiple files in a folder	Good code editor, website hosted on URL or IP address. Can easily work with multiple files in a folder
---------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------

6. Code quality

Code is a mess	Meaningful naming of files and code. Code is generally clear. Care for indenting, capitalisation and structure of code and files.	Code and files are well structured. Great care has been taken for good naming and indenting.
----------------	-----------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------

7. Adaptability

It's hard and complex to change i.e. text colour	Change of i.e. text colour can be done within a minute	Change of i.e. text colour can be done within seconds
--------------------------------------------------	--------------------------------------------------------	-------------------------------------------------------

Constructive Feedback on how to improve

use superclasses for changing your colors!
check naming .

Evaluation of pitch and website

Student name	Valentijn Boonstra
Evaluated by	F. Tolhoek

Front end, design and presentation

In the pitch of about 5 minutes, mark the following four categories and provide feedback for the student.

1. Are all necessary webpages implemented

Website is obviously missing important content	All necessary pages are there with content.
------------------------------------------------	---------------------------------------------

2. Design Creativity & presentation

On a scale of 1 to 5, how much do the website and pitch exhibit creativity, well thought out design and well presented? Is it complete with necessary content Think of original points of view, used resources, layout and design, and other "wow" factors.

1	2	3	4	5
---	---	---	---	---

Choose a different font than Times New Roman
try to make the layout more colourful and modern

3. Study & Career Motivation

On a scale of 1 to 5, how motivated does the student appear for the ICT domain and programme?

Think of how detailed the motivation is described or not, Conveys knowledge on the program, different careers and possibilities within the IT field, Knowledge about strengths but also how to tackle potentials risks or personal challenges.

1	2	3	4	5
---	---	---	---	---

Constructive Feedback on how to improve

ICT isn't going to be boring?

ICT

A reason why the studies suits me is because I'm very motivated to work on projects and it is a bit addicting to see the page building up. At the beginning it doesn't look like anything, but the longer you work on the project the more it starts coming together.

The possibilities are endless, when coding you can make everything the way you would like to make it. It might take a long time but after you invested all the time in it you will see the results as well.

I'm really looking forward to learning more about ICT related topics.

Another reason I think ICT is a studies will fit me is because I like working with my computer. Usually in my free time I like to be on my pc, so it won't take a long time for me to get used to being behind a screen for a big part of the day. The picture underneath is the computer that I built myself.

Ever since I built my own PC I've been very interested in almost all sides of computer science. So I started playing around with mods on several games. Together with another friend I also restored an old pc that wasn't booting anymore.

Some of the subjects that I had in school will definitely help me through the study, here is a list of some subjects that will be useful:

- Philosophy
- English

Valentijn Boonstra

Hi! My name is Valentijn, I'm a 16 year old boy from the Netherlands. My birthday is October 8 Even though I've lived in Middelburg all my life I was born in the ADRZ, which stands for Admiraal de Ruijter Ziekenhuis, in Vlissingen.

After elementary school I went to my high school in Kapelle, so I had to go there by train.

I built my own pc, I did this with a friend who lived close to me. To this day it's one of my biggest passions to be on my pc and play games. I usually play fps games.

Here is a list of my (currently) favourite games

1. Apex legends
2. Overwatch
3. Valorant

Another one of my passions is music. I listen to all sort of music but my favourite is rock music.

Right now I listen a lot of Machine Gun Kelly's music.

Next year the kind Laroï is going to be giving a concert in Amsterdam which I will go to.

FAQ

Q: How can you print a document from your laptop at hz?

A: Go to <http://print.hz.nl> and log in with your hz information, then you can upload your file. If you go to the printer and scan your student card you will be able to print the document

Q: How can you scan a document and sent it to your laptop at hz?

A: When you show your HZ pass to the right of the printer downstairs off the hz building you can scan the document that you want to scan. When you've scanned it, it will be send to you inbox.

Q: What do you need to do when are sick / show symptoms of corona virus?

A: Contact my teachers that you wont be coming to school. Then you have to take a test and while you wait for the results you can follow all the lessons at home.

Q: How can you book a project room in one of the wings?

A: If you go to the portal.hz > selfservice portal > make a reservation > reserve a meeting room > pick a date and time and save it.

Q: What are the instructions if you want to park your car at the hz parking lot?

A: Unfortunately it's not possible to park your car at the parking lot next to the hz because of the construction on the side. It is possible to park your car for free at the PZEM building

[go back](#)

First, you had to apply to two companies that you would like to know more information about. The first period was easy for me, Damen is a company which I already knew but didn't know a lot about. The second period I visited veracode, this was way to complicated for me and also not that interesting.

In the afternoon we had to make a poster for a company, this company was given to us. At first I wasn't interested in the company Atos. But when looking up more information about it I started to enjoy it.

Why would I like to work here?
The size of the company is very impressive and because the company is home in so many branches you can basically work in whatever situation you want to.
The company also gives a lot of opportunities to grow and become a better version of yourself, this is very interesting to me.
The only downside that I could think of is that because of the size of the company there might not be a lot of personal attention for you (for example) have questions.

Why would I like to work here?
I've always liked going to the Damen shipyard in Vlissingen when I was younger. But I thought that there wouldn't be a job for me there now that I'm doing the ICT study, so naturally I heard that there were a lot of jobs for us at Damen I was very happy.

I would like to work at Damen because of the size. All the boats they build are different so it's always an adventure what's going to happen.

The only downside that I can think of is that there are a lot of secrets that come with the job, and it's difficult for me to keep those to my grandpa.
